Marketplace Management done for you

Maximise the value of your Microsoft and AWS Marketplace listings

The way customers buy enterprise software is changing.

More and more enterprise buyers are skipping cold calls and going straight to the source: cloud marketplaces. Whether it's to simplify procurement, speed up vendor onboarding, or make use of pre-approved budgets — platforms like Microsoft Azure Marketplace, AppSource, and AWS Marketplace are fast becoming the default buying path.

If your solution isn't listed — or if your listing isn't optimised — you're missing out on enterprise opportunities, co-sell traction, and channel visibility.

US$45B: Projected global cloud marketplace sales by the end of 2025 (Canalys)

50%+: Hyperscaler marketplace sales will go through partners by 2027

AI-driven procurement is fast-tracking transactable listings and auto-matching buyers to vendors

Marketplace listings aren't set-and-forget. From initial setup to lifecycle management, we take care of the details so your listing stays compliant, visible, and aligned with your go-to-market strategy. Including:

- Transactable and non-transactable offer setup
- Listing optimisation and copywriting
- Metadata and image asset management
- Offer updates, versioning, and compliance
- Lifecycle management (launch → update → retire)
- Co-Sell Ready alignment and CPOR support
- Analytics reporting and performance tracking
- Integration with your website, GTM, and campaigns
- Guidance on Microsoft Co-Op and MDF funding use

Perfect For

- Microsoft Partners with one or more Marketplace listings
- ISVs and Solution Implementors targeting enterprise projects
- Teams looking to simplify and scale their co-sell motion
- Anyone who's been handed a Partner Centre login and thought... "Now what?"

Why Inception?
